Ferbo GD100/400

Ferbo irrigation pump

The timed online dispersal sale of modern potato and arable equipment attracted bidders from all corners of the UK, Ireland and Europe. The opportunity to purchase such modern potato equipment does not come up often and it was evident from the competitive 'end user' bidding that nice, clean, second hand equipment is proving a more viable alternative to the high cost of new.

The sale was topped by a highly spec'd Grimme Varitron 470 Platinum self propelled harvester, which saw highly competitive bidding from both local potato growers and growers as far as Scotland. Having completed 1408 work hours and 2842 engine hours, registered on a 68' plate the machine was purchased by a local grower for a fantastic £305,000.

There was fierce last-minute bidding for the Simpson's CLAAS Lexion 750TT combine, with the bidding extending over an hour past the initial finish time! Registered on a 12' plate and having undertaken only 1765 work hours the machine eventually sold to a local farmer. The farms fleet of Bailey and Triffitt trailers all sold well, with the two Triffitt trailers sold for export to Eastern Europe!
